to use Edge Transport servers have the option of deploying Edge Transport servers running the latest release of Exchange 2010 or later. Use Edge Transport servers if you don't want to expose internal Exchange servers directly to the internet.

Edge Transport servers with hybrid deployments | Microsoft ...

A: No. Edge Transport is an optional role, which has been the case for all versions of Exchange that have had an Edge role available. The consolidation of Exchange 2016 server roles into just two (Mailbox, and Edge Transport) doesn't change that. You can deploy a simple Exchange 2016 environment on a single Mailbox server,

with no Edge Transport server deployed at all.
