Different types of foam can be used in the manufacture of planes, with different foam suiting different applications. The main foams used are Expanded Polystyrene (EPS), Expanded Polypropylene (EPP), Expanded Polyolefin (EPO) and Depron.

### **Foam RC Airplanes**

A Grade: We originally contracted with R. L. Adams for a smooth finish, flat foam board (better than fanfold, and approaching Depron), A Grade foam has the smoothest, most consistent finish, and the least amount of thickness variation or waves. The most recent shipment has good smooth finish, but one or two sheets per box have waves/creases.

...

EPP Foam Expanded Polypropylene, also known as EPP, is an engineered plastic foam material. This foam is extremely durable and lightweight, because it is made out of little bubbles of CO<sub>2</sub> and polypropylene resin. This type of RC foam is inexpensive to manufacture, making the price of the airplane usually lower also.
